Dipti Patel

Windsor, ON, Canada | 437-329-0726 | diptip14397@gmail.com | LinkedIn | Portfolio

SUMMARY

Analyst with a **Master of Applied Computing** and **international experience across Canada, the UK, and India** in manufacturing analytics, retail operations, and software development. Turns raw data into **dashboards, reports, and clear recommendations**, validates every number before it reaches decision makers, and finds the **root cause** of performance issues. Works closely with business and technical teams and explains findings in plain language.

SKILLS

Data Analysis: SQL (Joins, CTEs, Window Functions), Python (Pandas, NumPy), Statistical Analysis, Root Cause Analysis, Trend Analysis, KPI Tracking
BI and Reporting: Power BI (DAX), Looker (LookML, Explores), Tableau, SSRS, Dashboards, Ad Hoc and Recurring Reporting
Data Engineering: Snowflake, dbt (Models, YML, DAG), ETL/ELT Pipelines, SQL Server (T-SQL), MySQL, Google Cloud SQL, SAP Data
Data Quality: Data Validation, Reconciliation, Testing, Discrepancy Investigation, Documentation
Microsoft Office: Advanced Excel (Pivot Tables, VLOOKUP, Power Query, Macros), PowerPoint, Word, Outlook, Power Automate
Tools and Methods: Git, GitLab CI, JIRA, Confluence, Agile, Requirements Gathering, SDLC, Java, PHP, C#, .NET
Professional: Stakeholder Communication, Problem Solving, Team Leadership, Training, Multitasking

PROFESSIONAL EXPERIENCE

Manufacturing Analyst (Co op) Windsor, ON
Vistaprint May 2026 – Dec 2026 (Expected)

- **Lead the Tableau to Looker migration** of a large plant report that all stakeholders use every morning, as the project owner, while also helping teammates with their migration work
- Migrate **more than 25 legacy SSRS reports** to Looker. For each one, study the old SQL and stored procedures, rebuild the logic on Snowflake data, build the data model and LookML, **reconcile every output** against the original, and get stakeholder approval before release
- Build **data models in dbt** with documentation and testing, and release them through GitLab merge requests
- Analyze **plant performance, productivity, and error trends** with SQL in Snowflake, find the **root cause** of issues such as a high reprint rate, and share clear recommendations with plant leaders
- Replaced an older SAP material data script with a **more accurate Python version**, giving buyers and planners at multiple plants a live view of the plant backlog
- **Investigate data discrepancies** through daily JIRA tickets and proactive plant monitoring, run validation checks and GitLab sandbox testing before every release, and **automate recurring reports**
- Answer ad hoc requests from Finance, Manufacturing, and Supply Chain, meet weekly with stakeholders to **gather requirements** and show progress, train users on new reports, and document work in Confluence

Shift Leader and Operations Manager London, UK
Never Get Limited Dec 2021 – Oct 2024

- **Managed a 25 person retail team** and tracked **sales, productivity, and quality metrics** every week, coaching staff to meet targets
- Found the **root cause** of order picking errors and ran focused training that **reduced them by 30%**
- **Reconciled inventory against stock records** to correct discrepancies, and sustained **100% on time delivery**
- Presented **data driven insights** and process improvement recommendations to management

Backend Web Developer Surat, India
Leo Can Technologies Jan 2021 – Sep 2021

- Engineered backend features and **RESTful APIs** using Java and PHP with a MySQL database, supporting the core workflows of the application over a 9 month engagement
- Enforced **server side validation** and user authentication to protect record integrity, so the data stored and returned by the application stayed accurate and secure
- Worked as part of a development team, managing code in **Git** and assisting with integration testing and QA ahead of releases so features were stable before going live

EDUCATION

University of Windsor Windsor, ON
Master of Applied Computing May 2025 – Dec 2026 (Expected)

- GPA: 3.46/4.0 (84.7%). Coursework: Advanced Database Topics (built **Power BI dashboards**), Statistical Learning, Data Analysis Fundamentals

Gujarat Technological University Ahmedabad, India
Bachelor of Engineering in Computer Engineering Aug 2017 – Sep 2021

- GPA: 3.6/4.0

ACADEMIC PROJECTS

Probabilistic Graphical Models for Healthcare Decision Support Sep 2025 – Dec 2025

- Built a **Bayesian Network decision support system** to estimate heart disease risk, using probabilistic inference to show how each risk factor affects the outcome
- Developed a complete **Python pipeline** with Pandas, NumPy, and pgmpy covering **data cleaning**, structure learning, parameter learning, and inference with Variable Elimination
- Reached an **AUC of 0.91 and 88% accuracy**, **outperformed logistic regression**, and explained results in simple terms so decision makers could act on them

Secure Finance System Sep 2025 – Dec 2025

- Designed a secure financial application with **role based access** for Admin, **Auditor**, and User roles, built on a cloud hosted Google Cloud SQL database
- Implemented account management, fund transfers, transaction history, and **audit logging** so every change could be traced back to the user who made it
- **Verified every transaction for accuracy** using commit and rollback and concurrency control, and **debugged issues with SQL queries and system logs**
